Jim

I believe someone was collecting air samples around the impoundment in July or August. Mrs. Lauff had sent me pictures with what I believe was air monitoring equipment. My guess is that Range was collecting the samples.

Other than pictures of the monitors – I am not aware of any other air sampling.

Subject: ATSDR/ Carter Impoundment

Debbie,
I received a call today from Lora and Bob from the ATSDR. They had a question and I wasn't exactly sure what the current answer is...do you know of any current air quality sampling being conducted near the Carter Impoundment? I was part of the GMapping. I am not aware of additional sampling after that. I wasn't sure if any of the nearby residents currently had any canisters deployed, or if they had canisters in place after the GMap occurred. I spoke with the state DEP today. They were not aware of any. Please let me know what you might have heard.
Thanks,
Jim
